PROFILE

Junior Software Developer with 2 Years experience.

I am a qualified and professional with knowledge in Front End and Back End.

Design, Built, put it on production, give maintaining, actualization and support to my Apps and Web Sites Clients.

As ex-Banks employ, I know that communication is fundamental in business and customer support; that's why Soft Skills are so important in the industry.

Experience leading work teams, Designing work strategies.

Team player with an eye for detail.

It's very important for me to understand how the system works and from there find the required solution. Learn to learn is a fundamental stone for always be updated.
