PROFESSIONAL SUMMARY

High-performance Full-Stack Engineer with **6 years of experience** building scalable products, Digital Twin ecosystems, and low-latency industrial dashboards. Specialist in **MERN architecture**, high-availability **AWS deployments**, and production-ready code. Delivers with 100% discipline — focused on architectures that scale, systems that last, and code that performs under the heaviest loads.

ACTIVE ECOSYSTEMS — DIGITAL TWINS

Project	Status	Stack	Purpose
Software DT	Production	MERN · Docker · AWS	Core Architecture & Management
Drone DT	Development	MERN · TS · Docker	E-Commerce & Industrial Store
Drone Dashboard	Development	MERN · TS · AWS	Management & Sales Monitoring
Emerald DT	Construction	MERN · TS · AWS	High-Value Asset Management
Video DT App	Development	MERN · TS · Docker	Real-time Industrial Monitoring
NurseWebSite	Live	Vanilla JS	Healthcare Platform

TECHNICAL ACHIEVEMENTS

- High-Availability Double-Cluster:** Engineered dual AWS cluster architecture with full redundancy and industrial-grade security — zero-downtime production environments at scale.
- Mass Production Readiness:** Systems designed for low-latency performance under heavy concurrent load, built to industrial standards with observability from day one.
- 100% Velocity & Reliability:** Sustained 290-day unbroken commit streak with 11,000+ contributions across 38+ active repositories — elite, consistent delivery.
- Digital Twin Ecosystem:** Designed and deployed 5+ interconnected Digital Twin platforms spanning IoT real-time data, drone management, asset tracking, and healthcare.

"Building scalable systems with 100% discipline. Code that scales, architecture that lasts."
